

Anthony Energy Controller

Control Energy & High Ambient Conditions

Take the guess work out of saving energy by controlling anti-condensate door heaters with Anthony's Automatic Energy Controller. The Anthony Energy Controller comes standard factory installed on all Domestic (US & CANADA) Anthony Walk-In Cooler/Freezer Frames and ideal for both cooler and freezer applications in high and low humidity environments. Anthony Energy Controller activates anti-condensate heat when Dew Point Temperature is sensed. Whatever the condition - Anthony's Automatic Energy Controller will reduce your energy costs.

Features

- Ideal for humid applications and high humidity variability
- Automatic
- Sensor button allows retailers to activate heat for 24 hours, regardless of dew point - great for improved door gasket seal after gasket replacement.
- Activates anti-condensate heat when 10° F above Dew Point Temperature sensed
- 108" long Sensor Wires
- 20" long Power leads

Specifications

Applications:	Cooler and Freezer
Part Number:	60-22715-0002
Input Voltage:	100 - 230 VAC
Frequency:	50 - 60 Hz
Max Current:	10A
Warranty:	12 Months

Anthony Automatic Energy Controller is compliant to this certification:

Rev. C 09/20
